

[ Regulatory Roundup ]

## September 9, 2016

Regulatory Roundup is a weekly compilation of employee wellness and safety news. Please share this information with your policyholders as appropriate. For suggestions, contact David Wylie at ext. 3863.

#### **Texas Mutual News**

#### Make safety a universal language

In 2015, there were 26.3 million foreign-born people in the U.S. labor force, comprising 16.7 percent of the total. This week's blog post explained how to break down communication barriers and make safety a universal language...<u>MORE</u>

### Mine Safety and Health Administration (MSHA)

#### MSHA issues water-related fatalities safety alert

Since 2005, 24 miners have died while working on or near water. A recent MSHA safety alert explains the hazards and provides safety tips...<u>MORE</u>

### **Occupational Safety and Health Administration (OSHA)**

### OSHA now offers its entire website in Spanish

OSHA recently announced that users can instantly translate any page on its website into Spanish by clicking a button in the upper-right corner of the page...<u>MORE</u>

### OSHA seeks first update to shipyard fall rules since 1971

OSHA is seeking input on proposals to revise its fall protection rules for shipyard settings. According to the public notice, OSHA would make the regulations more consistent and do more to determine technological advances, best practices and outdated provisions. OSHA has not updated its shipyard fall protection standards since 1971...<u>MORE</u>

### Studies, Resources, Trends

### Your aging workforce and the work comp implications

By the year 2022, nearly 68 percent of 55- to 64-year-olds will still be working, according to the Bureau of Labor Statistics. Older workers bring experience and the ability to mentor younger workers. But they also present challenges, including health issues and higher workers' comp claim costs...MORE

## Study examines how financing constraints affect workplace safety

A new study by researchers at the University of Texas found that injury rates increase with negative cash flow, suggesting some companies cut safety from the budget when business gets lean...<u>MORE</u>
